

Audience Behavior Report

Consumer Insights Division — H2 2025

Key Findings

Analysis of 2M+ watch sessions in H2 2025 reveals significant shifts in viewer behavior. Mobile-first consumption now accounts for 58% of all streams, up from 41% in H1 2024. Binge-watching (3+ episodes/titles in one session) is most prevalent in the 18-24 age group (67% of sessions). Average session length increased to 94 minutes, suggesting stronger content engagement.

Demographics Breakdown

Age Group	Share of Viewers	Avg Watch Time	Top Genre	Preferred Device
13-17	8%	52 min	Action	Mobile
18-24	22%	94 min	Sci-Fi	Mobile
25-34	31%	88 min	Thriller	Laptop
35-44	21%	76 min	Drama	TV
45-54	12%	61 min	Drama	TV
55+	6%	48 min	Drama	TV

Regional Engagement Insights

Bangalore recorded the highest engagement score (8.7/10) driven by the tech-savvy young adult demographic. Mumbai leads in total viewer volume but shows higher churn in the 35+ segment. Chennai showed the fastest month-over-month growth (+18%) following the launch of Tamil-language originals. North Indian cities (Delhi, Lucknow) show strong Drama preference and longer average session lengths.

Completion Rate Analysis

Genre	Avg Completion Rate	Drop-off Point	Recommendation
Drama	82%	Minute 95	Maintain current pacing
Sci-Fi	79%	Minute 80	Tighten act 2 structure
Thriller	76%	Minute 70	Stronger mid-point hook
Action	61%	Minute 55	Reduce setup time
Comedy	48%	Minute 30	Urgent content review needed
